To whom it may concern,

We engaged Schooley Mitchell Telecom Consultants/Pete Carfagno to analyze our telecommunications environment and make recommendations on a course of action to save us money. Their recommendations saved us over 30% of the monthly expense on cellular and over 20% on land lines and we did not have to change providers.

We were impressed with the suggestions that Pete made in order to reduce our increasing cellular expenses and we like the idea and value of having someone audit the bills on a quarterly basis to keep us right where we want to be.

SMTC/ Pete provided us with the advice to reduce the expense, implemented the changes, and interfaced with the providers which saved us time and effort. Once the changes were made he spent time with us to set us up on line for management and payments and showed us exactly the money saved.

I highly recommend Schooley Mitchell Telecom Consultants and endorse their quality of work, follow up and professionalism. The results saved us time, money and provided us with a trusted advisor to ensure us the best services in the future.

Thank You,

Formica Brothers Bakery
Atlantic City NJ.
