RE: TELECOM EXPENSE REDUCTIONS

To Whom It May Concern:

Please let this letter as my formal recommendation of Stephanie Wayne and the Schooley Mitchell Telecom Consultant expense reduction program. I have to admit, I was skeptical at first about the amount of telecom savings Stephanie initially thought she could save our company. In the end I figured, "What have I got to lose since the process costs me nothing and could ONLY benefit my bottom line?"

The only thing I had to do was to provide her with three months worth of our local/long distance, internet and cellular bills which took less than 15 minutes. The research and optimization process Ms. Wayne put our company through was amazing. I NEVER would have had the time or background to do what she did. It was significantly more comprehensive than I could have imagined. I would not even have begun to know the right questions to ask or problems to look for.

The best part about it was we did not even have to change vendors (Stephanie handled the service changes flawlessly with no down time) and **we saved 27 percent on our telecom expenses which was over \$14,000 a year!** In addition, she found lines that were not working, too many lines in some of our offices and even some billing errors which we got back from the telecom vendor.

I am delighted with the Schooley Mitchell Telecom Consultant optimization program we went through and would strongly encourage others to go through it as well. In the end, what do you really have to lose? Thank you Stephanie!

Sincerely,

Kim Seamans
