To whom it may concern:

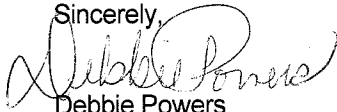

We engaged Sean Fox of Schooley Mitchell Telecom Consultants to review our cellular services, which represent a significant expense to our business. On the heels of an internal review, Schooley Mitchell was able to save us an additional 18% with our existing supplier. Schooley Mitchell presented a professional report that was thorough, easy to understand and applicable to our business.

Sean meets with us on a quarterly basis to review our bill for accuracy and to make subsequent recommendations on ways to trim our costs. I appreciate the ongoing vigilance Schooley Mitchell offers as part of their service.

As a growing company, we are constantly making modifications to our cellular plan. Many of our 40 cellular users require different needs and Schooley Mitchell has worked with us to understand our business environment and to make recommendations that are objective and in our best interest.

Based on our results, we strongly endorse the services offered by Schooley Mitchell to any business, large or small, looking to save time, improve upon service levels and reduce cost.

Sincerely,

Debbie Powers
President
