September 2003

The Guelph Community Health Centre has recently had Mr. Neil Hostein from Schooley Mitchell Telecom Consultants do an evaluation of our telecommunication rates, services and internal system. The Centre is about to embark on a renovation and expansion and was interested in ensuring that we had the most cost and service effective system we could afford.

The Guelph Community Health Centre's experience working with Neil Hostein was very positive. Schooley Mitchell representatives were professional and easy to work with. They were very respectful of the agency's limited resources and expertise in the telecommunications field. They continued to be supportive even when our agency was not able to implement all of their recommendations.

The Guelph Community Health Centre would certainly consider using the services of Neil Hostein and Schooley Mitchell in the future and does not hesitate to highly recommend them.

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'Konnie Peet'.

Konnie Peet
Executive Director
