

To Whom It May Concern,

I am honoured to write this letter of recommendation on behalf of an incredible company, Trinity Precision. Located in Wichita, Kansas, Trinity Precision is a trusted producer of aerospace machined parts and assemblies.

Founded in 2014, Trinity Precision has grown significantly through the years and has become an industry leader. It is dedicated to leveraging automation, robotics, and technology to achieve top-quality results for its customers. Some of the technology used includes Fanuc Robomill for Robotic Cell, Okuma MU-5000 cell, Kitamura HX500IG for Harmdetals and Nexturn Swiss Mill Lathe, to produce only the absolute best quality parts.

Trinity Precision believes people are the pillars to its success which is why it works to find, retain, and develop the most talented employees for its team. The four founding members all share a common dream to have an impact on people's lives, create value for customers and be profitable and efficient. It also works with numerous trusted partners like Northrop Grumman, Gulfstream, Textron Aviation, Spirit Aerosystems and Triumph Group with whom Trinity Precision has created innovative solutions and solid relationships.

I highly recommend Trinity Precision for those in need of innovative aerospace solutions that lead to extraordinary service and value. You can have peace of mind knowing the team at Trinity Precision is backed by integrity and a strong desire to deliver nothing but the best.

Yours truly,

Rod Holter  
Strategic-Partner
