

To whom it may concern:

I would like to take this opportunity to write a letter of recommendation on behalf of a great business, Valtronic. Founded in 1982, Valtronic is a global, full-service electronic medical device contract manufacturer that specializes in developing, industrializing, and manufacturing Class I to III medical devices, including active implants.

Valtronic has 40 years of experience in turnkey devices, microelectronic assemblies, and miniaturization. From design, development, and manufacturing to assembly, testing, and packaging, Valtronic can cover the entire project. It has three facilities on three continents, 250,000 square feet of first-class production area, and lean manufacturing processes to allow the best possible service regardless of where clients need their products manufactured.

Not only is the service at Valtronic exceptional, but the team is as well. Each one is 100 percent committed to their clients and use their experience and knowledge of the industry to provide the best possible services. They are all kind, friendly and a true pleasure to interact with. It's easy to see how passionate they are about what they do the moment you contact them.

I recommend Valtronic without hesitation to anyone looking for a full-service electronic medical device contract manufacturer. With its great team, you can count on quality service and products, delivered on time and within budget.

Sincerely,

Kevin O'Shaughnessy
