

To whom it may concern,

I am pleased to write this letter of recommendation for AK Industries; it has established itself as a respected leader in the wastewater infrastructure industry since its founding in 1981. It has continued to grow while maintaining a strong reputation for producing durable and reliable products used in water and wastewater management systems across North America.

AK Industries specializes in the manufacturing of fiberglass lift stations, polyethylene septic tanks, sump basins, wastewater systems, and custom rotational molding solutions for municipal, commercial, industrial, and residential applications. With more than four decades of industry experience, it combines advanced manufacturing capabilities with engineering expertise to deliver products designed for long-term durability, efficiency, and performance.

What sets AK Industries apart is its dedication to customer service, product quality, and sustainable infrastructure solutions. As a family-owned and operated business, its team has always emphasized long-term relationships, responsive support, and continuous improvement throughout every aspect of their operations. They work closely with contractors, engineers, municipalities, and distributors to provide customized solutions while maintaining high standards of reliability and professionalism.

I highly recommend AK Industries, for its professionalism, manufacturing expertise, and ongoing commitment to delivering dependable water and wastewater infrastructure solutions that support communities and environmental sustainability.

Sincerely,

Nate Aiken
