

To whom it may concern,

I would like to take this opportunity to write a letter of recommendation on behalf of a great local businesswoman, Sue Proctor. Based in Peoria, Arizona, Sue is the proud owner of Cool Blew Inc. and a true asset to her community.

Introduced in 2002, Cool Blew Inc. provides quality residential and commercial plumbing, heating, and air conditioning repair and installation services, as well as solar contracting. This includes everything from thermostat repair and heat pump replacement to leak detection and solar panel installation.

I have had the opportunity of knowing Sue for a year now, and she has been a joy to work alongside. Sue and her team strive to leave home and business owners satisfied and confident with a job well done. With years of knowledge and experience, Sue truly takes care of her team and her clients, treating everyone like top priority and with the utmost care.

I highly recommend Sue and her team at Cool Blew Inc. for all your HVAC and plumbing needs. With top quality service and care that you can count on, Sue is here to make sure you get the help you require without any hassles.

Sincerely,

Dave Delles
