

To whom it may concern:

I am pleased to provide this letter of recommendation for Evaporation Works, a Tampa, Florida-based provider of advanced wastewater evaporation solutions. It specializes in patented accelerated evaporation technology designed to help industrial and municipal operators reduce wastewater volume, manage disposal challenges, and support environmental compliance.

It offers a range of scalable systems, including Varimax evaporators, T-Mister units, MegaMist systems, and customized evaporation solutions. Its services support applications across industries such as oil and gas, mining, municipal wastewater, manufacturing, power generation, and landfill operations. The company also provides system design and project support tailored to individual site conditions, flow requirements, and climate considerations.

A key strength of Evaporation Works is its knowledgeable and dedicated team. They bring extensive experience in wastewater management, customer support, and strategic development. This combination of technical expertise and collaborative service enables the team to develop solutions that address complex operational challenges while maintaining a strong focus on reliability and efficiency.

I highly recommend Evaporation Works for its innovative technology, specialized expertise, and commitment to developing effective wastewater management solutions. Its ability to provide customized systems and responsive support demonstrates a strong understanding of the diverse challenges faced by its clients.

Sincerely,

William McKissock
