

To whom it may concern:

I am pleased to provide this letter of recommendation for Rollens, a Centennial, Colorado-based company specializing in protective eyewear for dental and eye-care professionals. Established in 1989, it has developed a strong reputation for producing lightweight, disposable wrap-around lenses designed to provide comfortable and effective eye protection for patients.

Rollens offers a variety of protective products, including dental eyewear, post-mydriatic lenses, Rollens Plus, Foam Plus, EcoLens, and specialized tinted lenses. Its products are designed to protect patients from splatters, sprays, bright lights, and harmful ultraviolet exposure during dental procedures and eye-care visits. It also provides ordering resources and purchasing programs for practices requiring larger quantities of products.

A major strength of Rollens is its great team. Its dedicated professionals handle customer service, product assembly, distribution, and other operations from its Colorado facility. Under the leadership of Dan Salmore, the company maintains a knowledgeable and hands-on team committed to producing dependable products and supporting dental and eye-care customers.

I confidently recommend Rollens for its expertise, reliable products, and commitment to providing effective protective eyewear solutions.

Sincerely,

Matt Nagy
