

To whom it may concern,

I am pleased to write this letter of recommendation for CEM Engineering, a distinguished engineering consultancy based in St. Catharines, Ontario. With a well-established reputation in energy transition and decarbonization project delivery, it exemplifies a commitment to excellence that is evident in every facet of its operations.

CEM Engineering provides comprehensive services for the evolving energy sector, including advisory and feasibility studies, performance analysis, engineering design, project management, and full turnkey solutions. Over more than two decades, it has developed deep expertise across consulting, detailed design, contract administration, and commissioning in mechanical, electrical, civil/structural, and process disciplines.

The team is composed of highly skilled professionals whose collaborative approach and technical acumen drive outstanding outcomes. Its multidisciplinary staff, working across several Canadian offices, brings both breadth and depth of experience to complex engineering challenges, always upholding the firm's core values of care, adaptability, humility, and excellence.

I highly recommend CEM Engineering as it stands out as a reliable and innovative partner for engineering projects of significant scope and complexity. Its dedication to quality and sustainability makes it an exceptional choice for organizations seeking to advance impactful infrastructure and energy solutions.

Sincerely,

Stan Ossias
