

To whom it may concern,

I am more than happy to write this letter of recommendation for Linear Systems, a leading provider of high-performance, small-signal discrete semiconductors. Established in 1987, Linear Systems has built a strong reputation for quality, innovation, and exceptional customer service.

Linear Systems specializes in the design and manufacture of ultra-low-noise JFETs, high-speed DMOS switches, current-regulating diodes, and a variety of other advanced semiconductor components. Its products are integral to industries such as audio, medical electronics, industrial controls, and aerospace. Using proprietary and patented technologies, Linear Systems consistently delivers components that enable its customers to develop world-class products tailored to meet complex design requirements.

The team at Linear Systems is what truly sets it apart in the industry. Each one demonstrates an unwavering commitment to quality and collaboration. Their in-house expertise and state-of-the-art facilities ensure precision and reliability at every stage of production, and their technical support and extensive product literature, provide invaluable assistance to engineers and designers.

I highly recommend Linear Systems to any organization seeking innovative solutions and a dependable partner in technology. Linear Systems' commitment to excellence and industry expertise makes it an outstanding choice.

Sincerely,

Keith Crockett
