

To whom it may concern

It is my pleasure to write this letter of recommendation for Muller Technology. With almost 70 years of experience and the agility of a start-up, Muller Technology embraces the challenges of today, while consistently striving for outstanding results.

Muller Technology's rich history, dating back to 1952, showcases a legacy of expertise and dedication to the field of mold-making and automation technology. Its thin-wall molding technology stands out as the industry's leading method, and as a result, Muller has supplied thousands of molds and automation systems for major brands worldwide. Whether it's the food industry, consumer houseware, or healthcare, it is committed to ongoing research and development, ensuring its molds remain at the forefront of technological advancements.

Additionally, the successful nature and innovative spirit of the company are undeniably fueled by the 200-person staff located in both Switzerland and the U.S. This cohesive team of professionals houses a diverse range of skills, collaborating seamlessly to bring the most intuitive ideas to life. A notable example is its focus on producing low-carbon footprint packaging, lightweight materials, and energy-optimized equipment. Its recent collaboration with a leading European packaging manufacturer to develop the industry's first hybrid pail shows its commitment to reducing plastic usage and enhancing overall packaging sustainability worldwide.

Overall, I recommend Muller Technology as a reliable partner in mold-making and automation technology. The company's expertise, innovation, and commitment to environmental sustainability make it a standout choice for organizations seeking top-tier packaging solutions.

Sincerely,  
Matt Nagy
