

To whom it may concern:

We are more than happy to write this recommendation letter of behalf of a great practice, Sprains, Strains & Fractures. With two clinics in Sewell and Cherry Hill, New Jersey, its mission is to provide focused and expedient care for patients with all manners of orthopedic injuries.

Sprains, Strains, & Fractures offers a wide range of services. Some areas of expertise include foot and ankle pain, sports medicine, trauma care, and spine care. Its patients have direct access to seven board certified orthopedic surgeons, meaning every patient is treated quickly by an expert who will provide them with the best treatment options available. This process not only reduces the stress of an otherwise traumatic injury, but also is more patient-friendly than the traditional urgent care experience.

The whole team at Sprains, Strains, & Fractures, from surgeons to receptionists, consistently show a high level of empathy, expertise, and accountability. We all know trips to urgent care can be an emotional and uncomfortable experience when you or a loved one is hurt, and the Sprains, Strains, & Fractures team's commitment to reducing this upset is what truly sets them apart from other urgent care practices.

We highly recommend Sprains, Strains, & Fractures to anyone looking to have a safe recovery with highly trained specialists with the patient experience in mind. No matter what orthopedic issue is ailing you, Sprains, Strains, & Fractures will have you in the best possible hands.

Sincerely,

Michael Neil and Larry Nipon
