To Whom it May Concern:

Precision Accounting and Tax has served the San Francisco Bay Area for over a decade, providing comprehensive accounting and tax services. With expert bilingual fluency in both English and Chinese, we are well positioned to support the needs of Silicon Valley's diverse business community.

Like our clients, we are diligent about managing expenses responsibly. When Sanjeev Domingo from Schooley Mitchell reached out to help evaluate opportunities to optimize our cost structure, we welcomed the engagement. The risk-free model and their hands-on approach made the process easy—they conducted a thorough analysis of our telecom and SaaS expenses with minimal effort required from our team.

We were very pleased with the professionalism and depth of their analysis. While no additional cost-saving opportunities were identified at this time, the review confirmed that our expenses in these categories are well managed, which provided valuable reassurance.

We would confidently recommend Sanjeev Domingo at Schooley Mitchell to any organization looking to ensure they are operating efficiently and not overspending in key expense areas.

Sincerely,

Lewis Liu
