

**JRP MACHINE CO INC**  
CNC Turning and Milling Services

May 02, 2025

To whom it may concern:

I am writing to recommend the cost reduction consulting services provided by Schooley Mitchell.

At JRP Machine we provide precision CNC turning and mill cutting services. Our focus is on quality products and customer service. Saving money on operating costs allows to also be competitive with our pricing.

Over the years we have experienced good growth, and I wanted to make sure that JRP was not overcharged for our business expenses. Schooley Mitchell's services worked on my behalf to reconcile my invoices to my fee structures, review the market rates with all available vendors in my service area, and provide recommendations to help save me money. The best part is that the process took very little of my time and they don't charge any fees if they cannot find savings.

I highly recommend Schooley Mitchell to any business. As a business owner who is focused on staying on top of all the quotes and material in the marketplace, implementing growth strategies, and maintaining day-today operations, I have found benefit to leverage Schooley Mitchell's services to save JRP Machine time and money.

Respectfully,

Tatiana Hiese - Office Manager
