

To Whom it May Concern,

It is my pleasure to recommend Neil Schwan of Schooley Mitchell. As a nonprofit organization, we are careful stewards of our resources so we can best support the individuals and families we serve.

Cancer Wellness Center provides whole-person care, expert guidance, and a welcoming community for those navigating a cancer diagnosis. Managing expenses responsibly is an important part of sustaining that mission.

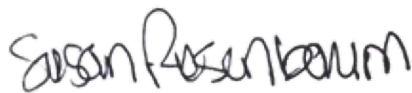

Neil and his team reviewed our telecommunications, credit card processing, and waste service expenses. The process was simple and required very little time on our end.

We were especially impressed when their analysis uncovered a 90% savings opportunity on our dumpster service, even though our vendor had told us we were already receiving a charity rate. These savings will directly support the services we provide to our community. Importantly, this was achieved without any disruption to our operations.

Their review also confirmed that our phone, internet, and processing costs were already well optimized, which gave us added confidence that we are managing our expenses effectively.

Overall, our experience was very positive. Neil is professional, thorough, and easy to work with. I would recommend him to any organization looking to ensure they are not overpaying.

Respectfully,

Susan Rosenbaum  
CFO, Cancer Wellness Center
